Please reject the petition that is trying to stop XM from providing instant traffic and weather information. I find this service invaluable. Our son and his wife live in Houston; we live in Laredo. When we go to Houston, we need to know the traffic and weather situations, and we need to know them on a timely basis. With the local Houston radio stations, most of the broadcast is commercials and other useless information. With XM, we get real, updated information instantly. We pay for this service and we appreciate it. It has probably saved our lives because of accident avoidance. We need XM Traffic & weather service. Sincerely,  
Pam Vaughan
